

WELL SUMMARY

Location ID: NASA-8

Pertinent Field Notes:

- 03/24/89 Lockheed removes dedicated bladder pump. Larjon adds 5' of PVC and 5' of protective steel casing to top of well in preparation for closure of 600 Area Impoundment. - Kaszuba
- 07/89 New concrete pad installed by Lockheed because old pad was covered during closure activities. Larjon cut inner PVC casing addition from 03/24/89 down to 3.0' above new concrete pad. - Egan
- 08/04/89 Updated survey data on well submitted to GCL by Botsford Land Surveying, Inc. Data is included in well file. - Egan
- 10/17/89 Redevelop well due to turbidity problems. Install poly-pipe in screen and jet with compressed air (filtered). - Egan
See redevelopment sheet for details.
- 10/20/89 Stop redevelopment at NASA-8 due to needs for this equipment on higher priority monitor well installations. Redevelopment of NASA-8 put on hold until equipment is available. - Egan
- 01/09/90 Lockheed Environmental Group has purchased equipment to conduct their own redevelopment of monitor wells and will redevelop NASA-8. - Egan
